SUMMARY

Software Development Engineer with 5+ years of experience in application development (January 2021–June 2026), specializing in legacy system modernization, full-stack development, authentication modernization, and low-code solutions. Experienced in application rewrites, cross-functional collaboration, mentoring new joiners, and delivering solutions used by large user populations.

PROFESSIONAL EXPERIENCE

Accenture — Application Development Senior Analyst

Mumbai | March 2025 – June 2026

- Led the rewrite project for User Admin Service, a core service supporting agent-facing applications.
- Guided and onboarded junior team members through knowledge-transfer sessions and technical walkthroughs.
- Contributed to Plus One initiatives, including a Power Apps Recognition Portal and a quiz portal.
- Supported application modernization, delivery quality, and cross-functional project execution.

Accenture — Application Development Analyst

Mumbai | March 2023 – March 2025

- Led and contributed to migration of authentication systems from SiteMinder to Okta across 8–10 applications.
- Collaborated with a cross-functional team to transition 10 million user logins to Multi-Factor Authentication (MFA).
- Maintained a defect percentage below 5% in code changes and consistently delivered solutions ahead of business deadlines.
- Modernized legacy AngularJS and VB.NET applications using React and .NET, improving performance, scalability, and maintainability.

Accenture — Application Development Associate

Mumbai | January 2021 – March 2023

- Developed and maintained front-end and back-end applications using React, JavaScript, .NET MVC, Node.js, TypeScript, and .NET Core.
- Used Jira and Rally to track progress, coordinate work, and support team delivery.
- Participated in product releases, iteration planning, and retrospectives to support continuous improvement and business alignment.

SKILLS

Frontend Development: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Responsive UI Development, Redux Toolkit, REST API Integration

Backend Development: .NET Core / ASP.NET Core, .NET MVC, C#, VB.NET, Node.js, RESTful API Development, Authentication & Authorization, SQL Server, MongoDB

Microsoft Power Platform: Power Apps, Power Automate, SharePoint Integration, Business Process Automation, Custom Forms & Workflows

Tools & Platforms: Okta, Firebase Authentication, Jenkins, Jira, Rally, PCF, GitHub Copilot, Python (in progress)

EDUCATION

Sinhgad College of Engineering — Bachelor of Engineering (B.E.), Information Technology

January 2016 – January 2020

PROJECTS & INITIATIVES

F1 Dashboard | Personal Project | 2026

- Built a web dashboard using HTML, CSS, and JavaScript to display Formula 1 race-related data.
- Integrated public APIs, including OpenF1 and Jolpica, to retrieve race data and render it dynamically in the browser.
- Exploring a Python-backed service to surface historical race data within the dashboard; this work is in progress.

Money Matters | Personal Project | August 2024 – October 2024

- Developed a minimal web application using React, Node.js, and MongoDB.
- Implemented OTP-based authentication with Firebase and enabled income and expense tracking with full CRUD operations.
- Integrated dynamic data visualizations and graphs to help users identify spending patterns.

Power Platform Initiatives | November 2021 – June 2026

- Delivered low-code/no-code solutions using Microsoft Power Platform.
- Developed a Power Apps Recognition Portal for employee nominations and approvals, supporting over 30,000 users.
- Built Trivia Trek, a quiz portal that engaged around 2,000 users during a five-day event.
- Built the DigiSign Portal to automate PDF signing and streamline the signature process.

CERTIFICATIONS

- Microsoft Certified: Power Platform Fundamentals
- Microsoft Technology Associate: Introduction to Programming using JavaScript
- GitHub Copilot (Credly credential)
